Editorial Focus

Land and Water is published for all those individuals involved in natural resource management and restoration, from idea stage through project completion and maintenance. They include but are not limited to contractors involved in erosion & control and land improvement, landscape architects, civil engineers and consultants, soil and water conservation districts, and roadside vegetation managers. For over 34 years, we have helped our readers gain access to this market by publishing job-site stories, case histories, and information on the latest developments in the industry with examples of applied technologies. Topics will be added as necessary to address specific requests from our readers.

The following is a partial listing of our editorial scheduled for the year 2009. Every issue of Land and Water features an average of ten editorial themes relating to the erosion control and water management industry. Our editorial goal is to provide practical solutions and innovative ideas that can be applied towards real-world situations.
